[Help](#) on the options is available.

**No DOCTYPE found! Attempting validation with HTML 4.01 Transitional.**

The DOCTYPE Declaration was not recognized or is missing. This probably means that the Formal Public Identifier contains a spelling error, or that the Declaration is not using correct syntax. Validation has been performed using a default "fallback" Document Type Definition that closely resembles "HTML 4.01 Transitional", but the document will not be Valid until you have corrected this problem with the DOCTYPE Declaration.

Learn [how to add a doctype to your document](#) from our [FAQ](#).

## This page is **not** Valid (no Doctype found)!

Below are the results of attempting to parse this document with an SGML parser.

- Error** Line 3 column 0: no document type declaration; implying "<!DOCTYPE HTML SYSTEM>".

```
<HTML>
```

The checked page did not contain a document type ("DOCTYPE") declaration. The Validator has tried to validate with a fallback DTD, but this is quite likely to be incorrect and will generate a large number of incorrect error messages. It is highly recommended that you insert the proper DOCTYPE declaration in your document -- instructions for doing this are given above -- and it is necessary to have this declaration before the page can be declared to be valid.

- Warning** Line 239 column 117: cannot generate system identifier for general entity "helpurl".

```
...lpwindow_parent.aspx?kb=alertbot.web&helpurl=/userkb/popup_panel.aspx"></scri
```

An entity reference was found in the document, but there is no reference by that name defined. Often this is caused by misspelling the reference name, unencoded ampersands, or by leaving off the trailing semicolon (;). **The most common cause of this error is unencoded ampersands in URLs** as described by the [WDG](#) in "[Ampersands in URLs](#)".

Entity references start with an ampersand (&) and end with a semicolon (;). If you want to use a literal ampersand in your document you must encode it as "&amp;" (*even inside URLs!*). Be careful to end entity references with a semicolon or your entity reference may get interpreted in connection with the following text. Also keep in mind that named entity references are case-sensitive; &Aelig; and &aelig; are different characters.

If this error appears in some markup generated by PHP's session handling code, [this article](#) has explanations and solutions to your problem.

Note that in most documents, errors related to entity references will trigger up to 5 separate messages from the Validator. Usually these will all disappear when the original problem is fixed.

- Error** Line 239 column 117: general entity "helpurl" not defined and no default entity.

```
...lpwindow_parent.aspx?kb=alertbot.web&helpurl=/userkb/popup_panel.aspx"></scri
```

This is usually a cascading error caused by a an undefined entity reference or use of an unencoded ampersand (&) in an URL or body text. See the previous message for further details.

4. **Error** Line 239 column 124: reference to entity "helpurl" for which no system identifier could be generated.

```
...w_parent.aspx?kb=alertbot.web&helpurl= /userkb/popup_panel.aspx"></script>
```

This is usually a cascading error caused by a an undefined entity reference or use of an unencoded ampersand (&) in an URL or body text. See the previous message for further details.

5. **Info** Line 239 column 116: entity was defined here.

```
...elpwindow_parent.aspx?kb=alertbot.web&helpurl=/userkb/popup_panel.aspx"></scr
```

6. **Error** Line 242 column 17: there is no attribute "LEFTMARGIN".

```
<body LEFTMARGIN=0 TOPMARGIN=0 MARGINWIDTH=0 MARGINHEIGHT=0 BGCOLOR=ffffff>
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the [FAQ item on valid flash](#).

7. **Error** Line 242 column 29: there is no attribute "TOPMARGIN".

```
<body LEFTMARGIN=0 TOPMARGIN=0 MARGINWIDTH=0 MARGINHEIGHT=0 BGCOLOR=ffffff>
```

8. **Error** Line 242 column 43: there is no attribute "MARGINWIDTH".

```
<body LEFTMARGIN=0 TOPMARGIN=0 MARGINWIDTH=0 MARGINHEIGHT=0 BGCOLOR=ffffff>
```

9. **Error** Line 242 column 58: there is no attribute "MARGINHEIGHT".

```
<body LEFTMARGIN=0 TOPMARGIN=0 MARGINWIDTH=0 MARGINHEIGHT=0 BGCOLOR=ffffff>
```

10. **Error** Line 246 column 105: required attribute "ALT" not specified.

```
... border="0" width="256" height="87" /></a>
```

The attribute given above is required for an element that you've used, but you have omitted it. For instance, in most HTML and XHTML document types the "type" attribute is required on the "script" element and the "alt" attribute is required for the "img" element.

Typical values for `type` are `type="text/css"` for `<style>` and `type="text/javascript"` for `<script>`.

11. **Error** Line 249 column 88: required attribute "ALT" not specified.

```
...eader1_Img2" width="19" height="105" /></td>
```

13. **Error** Line 251 column 108: document type does not allow element "FORM" here.

```
...lertbot.com/default.aspx?sc=AlertBot" ><tr><td
```

The element named above was found in a context where it is not allowed. This could mean that you have incorrectly nested elements -- such as a "style" element in the "body" section instead of inside "head" -- or two elements that overlap (which is not allowed).

One common cause for this error is the use of XHTML syntax in HTML documents. Due to HTML's rules of implicitly closed elements, this error can create cascading effects. For instance, using XHTML's "self-closing" tags for "meta" and "link" in the "head" section of a HTML document may cause the parser to infer the end of the "head" section and the beginning of the "body" section (where "link" and "meta" are not allowed; hence the reported error).

14. **Error** Line 251 column 112: document type does not allow element "TR" here.

```
...bot.com/default.aspx?sc=AlertBot" ><tr ><td
```

15. **Error** Line 252 column 95: required attribute "ALT" not specified.

```
...Header1_Img4" width="68" height="10" /><br>
```

16. **Error** Line 253 column 73: an attribute value specification must start with a literal or a name character.

```
...n_email class="TextBoxSignIn" size=13 value=><br>
```

17. **Error** Line 254 column 75: required attribute "ALT" not specified.

```
... id="Header1_Img5" width="60" height="14" /><br>
```

18. **Error** Line 256 column 13: document type does not allow element "TR" here.

```
</td></tr><tr ><td align=right><input src="images/bn_login_btn.gif" name="Header1
```

19. **Error** Line 256 column 107: there is no attribute "WIDTH".

```
...e="Header1:_ctl1" type="image" width="37" height="13" class="trans_border" />
```

20. **Error** Line 256 column 119: there is no attribute "HEIGHT".

```
...ctl1" type="image" width="37" height="13" class="trans_border" /></td></tr></
```

21. **Error** Line 256 column 171: end tag for "TABLE" which is not finished.

```
...ns_border" /></td></tr></form></table ></center>
```

Most likely, You nested tags and closed them in the wrong order. For example `<p><em>...</p>` is not acceptable, as `<em>` must be closed before `<p>`. Acceptable nesting is: `<p><em>...</em></p>`

Another possibility is that you used an element which requires a child element that you did not include. Hence the parent element is "not finished", not complete. For instance, `<head>` generally requires a `<title>`, lists (`ul`, `ol`, `dl`) require list items (`li`, or `dt`, `dd`), and so on.

22. **Error** Line 257 column 70: required attribute "ALT" not specified.

```
...gif" id="Header1_Img6" width="131" height="4" /><br>
```

```

65. **Error** Line 350 column 19: an attribute value must be a literal unless it contains only name characters.

```
<table width=92% border=0>
```

You have used a character that is not considered a "name character" in an attribute value. Which characters are considered "name characters" varies between the different document types, but a good rule of thumb is that unless the value contains *only* lower or upper case letters in the range a-z you must put quotation marks around the value. In fact, unless you have *extreme* file size requirements it is a very very good idea to *always* put quote marks around your attribute values. It is never wrong to do so, and very often it is absolutely necessary.

66. **Error** Line 350 column 29: document type does not allow element "TABLE" here; missing one of "APPLET", "OBJECT", "MAP", "IFRAME", "BUTTON" start-tag.

```
<table width=92% border=0>
```

The mentioned element is not allowed to appear in the context in which you've placed it; the other mentioned elements are the only ones that are both allowed there *and* can contain the element mentioned. This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "<p>" or "<table>") inside an inline element (such as "<a>", "<span>", or "<font>").

118. **Error** Line 546 column 13: an attribute value must be a literal unless it contains only name characters.

```
<td width=100% valign=top>
```

119. **Error** Line 549 column 73: end tag for element "FONT" which is not open.

```
...default.aspx" id="A23">Learn more</a> </font.>
```

The Validator found an end tag for the above element, but that element is not currently open. This is often caused by a leftover end tag from an element that was removed during editing, or by an implicitly closed element (if you have an error related to an element being used where it is not allowed, this is almost certainly the case). In the latter case this error will disappear as soon as you fix the original problem.

If this error occurred in a script section of your document, you should probably read this [FAQ entry](#).

120. **Error** Line 551 column 62: required attribute "ALT" not specified.

```
...rc="images/spacer.gif" id="Img6" width="50" height="5" />
```

121. **Error** Line 552 column 49: an attribute value must be a literal unless it contains only name characters.

```
<table cellSpacing="1" cellPadding="2" width=100% align=center border="0">
```

122. **Error** Line 554 column 39: duplicate specification of attribute "COLSPAN".

```
<td colspan="3" width="30%" colspan="5" valign=middle>
```

123. **Error** Line 555 column 100: value of attribute "ALIGN" cannot be "ABSMIDDLE"; must be one of "TOP", "MIDDLE", "BOTTOM", "LEFT", "RIGHT".

```
...dth="11" height="11" align="absmiddle" /> &nbsp;<b>Fast Facts</b>
```

The value of the attribute is defined to be one of a list of possible values but in the document it contained something that is not allowed for that type of attribute. For instance, the "selected" attribute must be either minimized as "selected" or spelled out in full as "selected="selected"; a value like "selected="true" is not allowed.

124. **Error** Line 555 column 102: required attribute "ALT" not specified.

```
...h="11" height="11" align="absmiddle" /> &nbsp;<b>Fast Facts</b>
```

153. **Error** Line 641 column 6: end tag for "TABLE" omitted, but its declaration does not permit this.

```
</form >
```

- o You forgot to close a tag, or
- o you used something inside this tag that was not allowed, and the validator is complaining that the tag should be closed before such content can be allowed.

The next message, "start tag was here" points to the particular instance of the tag in question); the positional indicator points to where the validator expected you to close the tag.
