## This Page Is Valid XHTML 1.0 Strict!

Tip Of The Day:

[Managing URIs](#)

Below is a list of the warning message(s) produced when validating your document.

- Warning** *Line 31 column 127: character "&" is the first character of a delimiter but occurred as data.*

```
...Web Site Monitoring: Website Monitor & Server Monitoring" /></a></td></tr>
```

This message may appear in several cases:

- You tried to include the "<" character in your page: you should escape it as "&lt;"
  - You used an unescaped ampersand "&": this may be valid in some contexts, but it is recommended to use "&amp;", which is always safe.
  - Another possibility is that you forgot to close quotes in a previous tag.
- Warning** *Line 140 column 81: character "&" is the first character of a delimiter but occurred as data.*

```
...es/vulnscan2.gif" alt="Security Scan & Assessment, Network Vulnerability Scan
```

The document located at <http://www.alertra.com/> was checked and found to be valid XHTML 1.0 Strict. This means that the resource in question identified itself as "XHTML 1.0 Strict" and that we successfully performed a formal validation using an SGML or XML Parser (depending on the markup language used).

To show your readers that you have taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the HTML you could use to add this icon to your Web page:

```
<p>
  <a href="http://validator.w3.org/check?uri=referer"></a>
</p>
```

If you like, you can download a copy of this image (in [PNG](#) or [GIF](#) format) to keep in your local web directory, and change the HTML fragment above to reference your local image rather than the one on this server.

A [full list](#) of icons, with links to alternate formats and colors, is also available.

If you use [CSS](#) in your document, you should also [check it for validity](#) using the W3C [CSS Validation Service](#).

If you would like to create a link to *this* page (i.e., this validation result) to make it easier to revalidate this page in the future or to allow others to validate your page, the URI is <http://validator.w3.org/check?uri=http%3A%2F%2Fwww.alertra.com%2F> (or you can just add the current page to your bookmarks or hotlist).

*The W3C Validator Team*
