Transitional **Revalidate With Options** Show Source Show Outline Validate error pages Verbose Output[Help](#) on the options is available.**This Page Is Valid HTML 4.01 Transitional!****Tip Of The Day:****Use international date format**

The document located at <<http://www.siterecon.com/>> was checked and found to be valid HTML 4.01 Transitional. This means that the resource in question identified itself as "HTML 4.01 Transitional" and that we successfully performed a formal validation using an SGML or XML Parser (depending on the markup language used).

To show your readers that you have taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the HTML you could use to add this icon to your Web page:

```
<p>
  <a href="http://validator.w3.org/check?uri=referer"></a>
</p>
```

If you like, you can download a copy of this image (in [PNG](#) or [GIF](#) format) to keep in your local web directory, and change the HTML fragment above to reference your local image rather than the one on this server.

A [full list](#) of icons, with links to alternate formats and colors, is also available.

If you use [CSS](#) in your document, you should also [check it for validity](#) using the W3C [CSS Validation Service](#).

If you would like to create a link to *this* page (i.e., this validation result) to make it easier to revalidate this page in the future or to allow others to validate your page, the URI is <http://validator.w3.org/check?uri=http%3A%2F%2Fwww.siterecon.com%2F> (or you can just add the current page to your bookmarks or hotlist).
