 Verbose Output

[Help](#) on the options is available.

**Note:** The Validator XML support has [some limitations](#).

## This page is not Valid XHTML 1.0 Transitional!

Below are the results of checking this document for [XML well-formedness](#) and validity.

- Error** *Line 18 column 48: required attribute "type" not specified.*

```
<script language="Javascript" src="/js/index.js" ></script></head>
```

The attribute given above is required for an element that you've used, but you have omitted it. For instance, in most HTML and XHTML document types the "type" attribute is required on the "script" element and the "alt" attribute is required for the "img" element.

Typical values for `type` are `type="text/css"` for `<style>` and `type="text/javascript"` for `<script>`.

- Error** *Line 46 column 16: end tag for element "div" which is not open.*

```
</ul></div></div><div id="homemain">
```

The Validator found an end tag for the above element, but that element is not currently open. This is often caused by a leftover end tag from an element that was removed during editing, or by an implicitly closed element (if you have an error related to an element being used where it is not allowed, this is almost certainly the case). In the latter case this error will disappear as soon as you fix the original problem.

If this error occurred in a script section of your document, you should probably read this [FAQ entry](#).

3. **Error** *Line 47 column 4: end tag for element "td" which is not open.*

```
</td ><td class="genbox"><table cellspacing="0" cellpadding="0" border="0" width
```

4. **Error** *Line 47 column 23: document type does not allow element "td" here.*

```
</td><td class="genbox" ><table cellspacing="0" cellpadding="0" border="0" width
```

The element named above was found in a context where it is not allowed. This could mean that you have incorrectly nested elements -- such as a "style" element in the "body" section instead of inside "head" -- or two elements that overlap (which is not allowed).

One common cause for this error is the use of XHTML syntax in HTML documents. Due to HTML's rules of implicitly closed elements, this error can create cascading effects. For instance, using XHTML's "self-closing" tags for "meta" and "link" in the "head" section of a HTML document may cause the parser to infer the end of the "head" section and the beginning of the "body" section (where "link" and "meta" are not allowed; hence the reported error).

5. **Error** *Line 49 column 88: required attribute "alt" not specified.*

```
...ce" src="/images/shim.gif" width="25" ></td>
```

6. **Error** *Line 49 column 93: end tag for "img" omitted, but OMITTAG NO was specified.*

```
...rc="/images/shim.gif" width="25"></td >
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with ">" instead of ">".

7. **Info** *Line 49 column 36: start tag was here.*

```
<td class="homesidebar" width="25" ></td >
```

9. **Info** *Line 55 column 0: start tag was here.*

```
</
```

10. **Error** *Line 58 column 83: end tag for "img" omitted, but OMITTAG NO was specified.*

```
...height="14" width="6" border="0"></td>  
.....
```

11. **Info** *Line 58 column 0: start tag was here.*

```
<  
.....
```

12. **Error** *Line 62 column 147: there is no attribute "onSubmit".*

```
...eckit" action="checkit.php" onSubmit="return checkStandardValues()">  
.....
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the [FAQ item on valid flash](#).

13. **Error** *Line 63 column 121: there is no attribute "onFocus".*

```
...http://www.your-domain.com/" onFocus="setEmptyValue();this.style.color='#000'  
.....
```

14. **Error** *Line 63 column 163: end tag for "input" omitted, but OMITTAG NO was specified.*

```
<style type="text/css" >
```

87. **Warning** *Line 137 column 58: cannot generate system identifier for general entity "vpackage".*

```
...orate" href="register.php?vtype=pack&vpackage=38" title="Click here for more
```

An entity reference was found in the document, but there is no reference by that name defined. Often this is caused by misspelling the reference name, unencoded ampersands, or by leaving off the trailing semicolon (;). **The most common cause of this error is unencoded ampersands in URLs** as described by the WDG in "[Ampersands in URLs](#)".

Entity references start with an ampersand (&) and end with a semicolon (;). If you want to use a literal ampersand in your document you must encode it as "&amp;" (*even inside URLs!*). Be careful to end entity references with a semicolon or your entity reference may get interpreted in connection with the following text. Also keep in mind that named entity references are case-sensitive; &Aelig; and &aelig; are different characters.

If this error appears in some markup generated by PHP's session handling code, [this article](#) has explanations and solutions to your problem.

Note that in most documents, errors related to entity references will trigger up to 5 separate messages from the Validator. Usually these will all disappear when the original problem is fixed.

88. **Error** *Line 137 column 58: general entity "vpackage" not defined and no default entity.*

```
...orate" href="register.php?vtype=pack&vpackage=38" title="Click here for more
```

This is usually a cascading error caused by a an undefined entity reference or use of an unencoded ampersand (&) in an URL or body text. See the previous message for further details.

89. **Warning** *Line 137 column 66: reference not terminated by REFC delimiter.*

```
...ref="register.php?vtype=pack&vpackage = 38" title="Click here for more details
```

If you meant to include an entity that starts with "&", then you should terminate it with ";". Another reason for this error message is that you inadvertently created an entity by failing to escape an "&" character just before this text.

90. **Warning** *Line 137 column 66: reference to external entity in attribute value.*

```
...ref="register.php?vtype=pack&vpackage = 38" title="Click here for more details
```

This is generally the sign of an ampersand that was not properly escaped for inclusion in an attribute, in a href for example. You will need to escape all instances of '&' into '&amp;'.

91. **Error** *Line 137 column 66: reference to entity "vpackage" for which no system identifier could be generated.*

```
...ref="register.php?vtype=pack&vpackage = 38" title="Click here for more details
```

This is usually a cascading error caused by a an undefined entity reference or use of an unencoded ampersand (&) in an URL or body text. See the previous message for further details.

92. **Info** *Line 137 column 57:* entity was defined here.

```
...porate" href="register.php?vtype=pack&vpackage=38" title="Click here for more
```

93. **Error** *Line 137 column 138:* document type does not allow element "h4" here; missing one of "object", "applet", "map", "iframe", "button", "ins", "del" start-tag.

```
...ails about the Corporate package"><h4>WatchMouse Corporate</h4><div><div clas
```

The mentioned element is not allowed to appear in the context in which you've placed it; the other mentioned elements are the only ones that are both allowed there *and* can contain the element mentioned. This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "<p>" or "<table>") inside an inline element (such as "<a>", "<span>", or "<font>").

94. **Error** *Line 137 column 168:* document type does not allow element "div" here; missing one of "object", "applet", "map", "iframe", "button", "ins", "del" start-tag.
